Not what I had hoped forBy CharlevoixI purchased this from based on the reviews listed here and was sadly disappointed. I had expected sort of a systematic catalog of porcelain and pottery pieces. This listed a number of items, but with no real depth at all. It is hit or miss. The chances that you can evaluate any individual item you may be interested in is very small. I returned mine to .1 of 1 people found the following review helpful. Much improved overall guide to pottery porcelainBy A CustomerThis 4th edition of the Antique Trader pottery porcelain price guide is well worth getting even if, like me, you have the 3rd edition already. The 4th edition has added categories and expanded its listings under each, and best of all has tons of pictures. Although they're in black and white the photos make it so much easier to recognize and identify styles, makers and specific pieces if you're looking up an item. Some of the categories have very limited entries but in general I think the editor did an excellent job of trying to cover a very broad range of collectibles in one volume. I know that one of the above reviewers criticized the book because they didn't list all of Royal Doulton -- I have a price list book that only covers the Royal Doulton figurines, and it's almost 500 pages! If you're very into one company or type of pottery/porcelain you need to get a reference book particular to that kind. For a general overview of a large genre, I would heartily recommend this book.

One of the best selling price guides for collectible ceramics is now completely revised, updated and expanded to more than 4,000 listings. This popular book includes some 50 categories of American and foreign pottery and porcelain, covering the full gamut of wares from the 18th through the mid-20th centuries. Several new categories are added and many others expanded for a total of more than 150 separate categories. The wide-ranging diversity of collectible ceramics makes this one of the most popular areas of collecting and this handy guide serves the needs of collectors, dealers and appraisers. Prices are given in US dollars.
