Not what I expected. Written in very simplistic language, the text wasn't formatted properly, as the extra returns placed randomly within the text added extraneous lines in the middle of paragraphs, making it difficult to read. No interesting graphics to support the text,

and no interesting sewing stories or tips.0 of 0 people found the following review helpful. I remember this" or "just like home"), and I even found a recipe that ...By Connie K. CrandallThis book took me back home. I, too, am a South Dakota native who grew up on a farm in the 1950s. I could relate to just about everything in the book (I kept saying "yes, I remember this" or "just like home"), and I even found a recipe that I've been looking for. I sent a copy to my sister-in-law and she enjoyed it as well.2 of 2 people found the following review helpful. Time travelBy Marileta RobinsonThis book brings to life a time and place that seem magical, in spite of (or because of) the lack of modern conveniences. The author writes of her childhood with love, warmth, humor, and a great eye for detail.

I love watching old movies on television because I know how everything worked in them. The telephone transmitted messages - that's all. The coffee makers just made coffee and only when you set them on the stove. Typewriters didn't have screens and lots of confusing options. Looking back, I still feel comfortable and at home with the way we lived.
