It was for a gift and she loved it! The only problem was that it arrived with some scratches on the front. Unfortunately, I didn't have time to swap it! I do recommend it to anyone that loves Fenton Glass.1 of 1 people found the following review helpful. Established in 1906, the Fenton Art Glass Company of Williamstown, West Virginia, has long produced glassware that fires collectors' passions. Over 900 color photographs capture the vases, pitchers, tidbit trays, candleholders, teacups, console bowls, and more, produced from 1940 to 1970. Many of these coveted items appear in print for the first time. Five years of research went into the text, providing a comprehensive listing of the art glass produced and the decorative motifs employed. Values are included in the captions.

About the Author John Walk owns Memory Lane Antiques in Mulberry Grove, Illinois, and has both collected and written about Fenton art glass for years.
