Lar Hothem, Jim Bennett : Indian Bannerstones Related Artifacts Identification and Value Guide before purchasing it in order to gage whether or not it would be worth my time, and all praised Indian Bannerstones Related Artifacts Identification and Value Guide:

0 of 0 people found the following review helpful. Book has good photos, but basically bannerstonesBy bassgirlBook has good photos, but basically bannerstones, I was hoping it would have other stone tools too, but not really1 of 1 people found the following review helpful. Indian BannerstoneBy Doris H. ThomasSame as with the bone and shell book the pictures are very clear it has great details not to much info it has price per artifactgreat buy.2 of 2 people found the following review helpful. all color photos!By jayThis book is perfect for identifying banner stones, I love that the book has all full color photos, its loaded with pictures a definite must have for any artifact collector.

Begun by the late Lar Hothem and completed by James R. Bennett, this co-authored identification and value guide focuses on the very popular and often ornate Indian bannerstone artifacts of ancient America. With several hundred full-color photographs representing some of America's most famous bannerstone collections, *Indian Bannerstones Related Artifacts* gives collectors an in-depth look at hundreds of the most prized ancient weapon components collected in modern times, including many rare and valuable examples.

This book uses hundreds of photographs to illustrate the components of an ancient type of spear. It's called an atl-atl, and was an improved method over simply throwing a spear. Instead, it was devised to project the spear from a greater distance and at an increased speed. The atl-atl consisted of a main shaft, about 16" to 24", a hook, a spear, and often times, a counter-balance weight called a bannerstone. About the Author Lar Hothem was a well-known expert in the field of Indian arrowheads and artifacts. His popular series, *Indian Artifacts of the Midwest* series has now added its 5th volume. His other titles include *Indian Axes Related Stone Artifacts*, *Indian Pipes*, *Arrowheads Projectile Points*, and *Indian Trade Relics*. Lar passed away in 2006. Jim Bennett was hooked on artifact collecting the moment he found his first arrowhead. While walking across a cornfield while out hunting one day, he stopped to tie a bootlace, and there it was - just sitting there, waiting to be found. From that very moment began his quest for knowledge and a deeper understanding of ancient man and the tools they left behind. Jim is from rural Ashland County, Ohio and enjoys living in the heart of Ohio's Amish county with Lisa, his wife and their four children.
