Minh Chung : Korean Treasures: Rare Books, Manuscripts and Artefacts in the Bodleian Libraries and Museums of Oxford University before purchasing it in order to gauge whether or not it would be worth my time, and all praised Korean Treasures: Rare Books, Manuscripts and Artefacts in the Bodleian Libraries and Museums of Oxford University:

The Bodleian Library and the museums of the University of Oxford are home to many historically significant and valuable manuscripts, rare books, and artifacts related to Korean history and culture. Despite their importance, many of these items have been overlooked within the libraries' collections and largely neglected by scholars. Korean Treasures seeks to change this by highlighting the many noteworthy and unusual archaeological relics and artworks in

the collections and presenting them together in a single volume for the first time.

"This beautifully illustrated book will be welcomed around the world by scholars and readers with an interest in traditional Korea. Minh Chung's scholarly and analytical text sets these treasures in the wider context of Oxford's ever-expanding collections of books and other objects related to Korea and its timely publication will provide encouragement to those who believe that Korean culture does not receive the consideration it deserves in the modern West."—Keith Pratt, University of Durham
